⁽¹⁾This table is being posted along with other risk assessment documents to provide interested persons with results from the Agency's pasteurized egg products testing program. Results from this testing program provided one of the bases for the draft risk assessment for egg products. FSIS promised at the October 22nd public meeting to make these results available as soon as possible. This table will soon be posted on the FSIS website along with tables of other existing testing results from ready-to-eat meat and poultry products.
