

APPENDIX II

U.S. RESIDUE LIMITS FOR PESTICIDES IN MEAT, POULTRY, AND EGG PRODUCTS

This appendix has been generated for the convenience of the reader, and if any discrepancies arise between this appendix and the Code of Federal Regulations (CFR) or Federal Register (FR), the values from the latter two sources should be used. Appendix II provides the chemical residue limits (tolerances and action levels) in each tissue by production class and by compound for pesticides in meat, poultry, and egg products. The Food Safety and Inspection Service (FSIS) in its regulatory programs apply chemical residue limits set by the Environmental Protection Agency (EPA). The official source of these tolerances is Title 40, Part 180 of the CFR. In addition, EPA may establish action levels, which are published in the FR. All chemical residue limits are provided in units of parts per million (ppm) unless otherwise noted.
