

APPENDIX II. U.S. RESIDUE LIMITS FOR VETERINARY DRUGS, FOOD ADDITIVES, AND UNAVOIDABLE CONTAMINANTS IN MEAT, POULTRY, AND EGG PRODUCTS

INTRODUCTION

This Appendix provides information on the residue limits (tolerances) for animal drugs, food additives and unavoidable contaminants in meat, poultry, and egg products, as of March 9, 2001. These tolerances, which are set by the Food and Drug Administration (FDA), are applied by the Food Safety and Inspection Service in its regulatory programs. The official source of these tolerances is Title 21 of the Code of Federal Regulations (CFR): those for animal drugs are found in Title 21, Part 556 (21 CFR 556); those for food additives are found in 21 CFR 172.140 and those for unavoidable contaminants are found in 21 CFR 109.30. This Appendix supplies the relevant citation for each tolerance.

FSIS does not permit concentrations of residues in meat and poultry that exceed the tolerances or action levels published in the CFR or FR. This Appendix supplies the relevant citation for each tolerance and action level.

The tolerances and action levels in poultry and livestock species are listed alphabetically by compound. These tolerances may be for the parent compound (the original chemical form of the compound given to the animal), or for the compound's metabolites (the chemical forms into which the compound is metabolized by the animal), or for a combination of parent plus metabolites. All tolerances are provided in units of parts per million (ppm) unless otherwise noted. Please note that this Appendix has been generated for the convenience of the reader, and if any discrepancies arise between this Appendix and the CFR, the values from the latter source should be used.

Unless otherwise indicated, "meat by-products" include kidney and liver.

Compound	Species	Fat (ppm)	Meat (ppm)	Meat By-product (ppm)	Liver (ppm)	Kidney (ppm)	Edible Tissue (ppm)	Reference
2-Acetylamino-5-nitrothiazole	Cattle Goat Hogs Horse Poultry Sheep						0.1 ¹	21 CFR 556.20

Footnotes:

1. Turkey
2. Marker residue: albendazole 2-aminosulfone
3. Pheasants and quail
4. No tolerance required

5. Chicken
 6. Chicken and turkey
 7. Marker residue: desethylene ciprofloxacin
 8. Concentration in parts per trillion (ppt)
 9. No tolerance required
 10. Marker residue: N-methyl-1,3-propanediamine
 11. Action level
 12. Heifers; no residues are permitted at concentrations above these, which represent the levels naturally present in untreated animals
 13. Calves
 14. Pheasants
 15. Marker residue: 8-alpha-hydroxymutilin
 16. Concentration in parts per billion (ppb)
 17. Tolerances are for the sum of all approved tetracycline residues (i.e., tetracycline, chlortetracycline, and oxytetracycline)
- B: American bison
- S: Chicken skin
- SF: Skin with adhering fat
- R: Rabbit
- W: Whole egg
- Y: Egg yolk
