Semiannual Regulatory Agenda, Spring 2009

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of significant and not significant regulations being developed in agencies of the U.S.

Department of Agriculture (USDA) in conformance with Executive Order 12866 “Regulatory Planning and Review.”

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication, except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

USDA’s complete regulatory agenda is available online at www.reginfo.gov. Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C.

602), USDA’s printed agenda entries include only:

(1) Rules that are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules identified for periodic review under section 610 of the Regulatory Flexibility Act.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action. For general comments or inquiries about the agenda, please contact Michael Poe, Office of Budget and Program Analysis, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

Dated: March 6, 2009.

Michael Poe,

Chief, Legislative and Regulatory Staff.

Agricultural Marketing Service (AMS)

1. NATIONAL ORGANIC PROGRAM: ADD STANDARDS FOR THE ORGANIC CERTIFICATION OF WILD CAPTURED AQUATIC ANIMALS, (TM-01-08)

Legal Authority: 7 USC 6501 to 6522

Abstract: The Agricultural Marketing Service (AMS) is revising regulations pertaining to labeling of agricultural products as organically produced and handled (7 CFR part 205). The term “aquatic animal” will be incorporated in the definition of livestock to establish production and handling standards for operations that capture aquatic animals from the wild.

Production standards for operations producing aquatic animals will incorporate requirements for livestock origin, feed ration, health care, living conditions, and recordkeeping. Handling standards for such operations will address prevention of commingling of organically produced commodities and prevention of contact between organically produced and prohibited substances.

2. NATIONAL ORGANIC PROGRAM: DAIRY REPLACEMENT ANIMALS (LIVESTOCK) (TM-07-03)

Legal Authority: 7 USC 6501

Abstract: The National Organic Program (NOP) is administered by the Agricultural Marketing Service (AMS). Under the NOP, AMS established national standards for the production and handling of organically produced products. Since implementation of the

NOP, some members of the public have advocated for amending the regulations for sourcing dairy replacement animals. They have asserted that the current regulatory language on sourcing dairy replacement animals lacks clarity, has established an inequitable two track system, and has harmed organic dairy producers by creating an environment that has prevented the development of a market for organic dairy replacement animals. They seek amendment to the

regulations to require that once a dairy operation has converted to organic production all future animals be organic from the last third of gestation.

3. MUSHROOM PROMOTION, RESEARCH AND CONSUMER INFORMATION ORDER (FV-08-702)

Legal Authority: 7 USC 6101 to 6112

Abstract: The Farm Bill of 2008 amends the Mushroom Promotion, Research and Consumer Information Act of 1990 by changing the number of regions for nominations purposes from four to three; adjusting the number of pounds required to appoint members to the Mushroom Council; and to allow for the development of good agricultural and good handling practices.

4. NATIONAL ORGANIC PROGRAM: ACCESS TO PASTURE (TM-05-14)

Legal Authority: 7 USC 6501 et seq

Abstract: The National Organic Program (NOP) is administered by the Agricultural Marketing Service (AMS). Under the NOP, AMS established national standards for the production and handling of organically produced agricultural products. Since implementation of the NOP, some members of the public have advocated for a more explicit regulatory standard on the relationship between livestock, particularly dairy animals, and grazing land. They have asserted the current regulatory language on access to pasture for ruminants and temporary confinement based on an animal's stage of production, when applied together, do not provide a uniform requirement for the pasturing of ruminant animals that meet the principles underlying an organic management system for livestock and livestock products that consumers expect. Comments received as a result of the proposed rule will assist in determining the Agency's next steps in rulemaking on this issue.

5. DAIRY IMPORT ASSESSMENTS (DA-08-07)

Legal Authority: 7 USC 4501 to 4513

Abstract: The Agricultural Marketing Service is establishing a dairy import assessment program as required by law. This action is in conformance with the Food, Conservation, and Energy Act of 2008 (Farm Bill). The Farm Bill mandates that the Dairy Promotion and Research Order be amended to implement an assessment on imported dairy products to fund promotion and research, and allow for importer representation on the National Dairy Promotion and Research Board.

6. NATIONAL ORGANIC PROGRAM, SUNSET (2011) (CROPS AND PROCESSING) (TM-07-14)

Legal Authority: 7 USC 6501

Abstract: The Agricultural Marketing Service (AMS) is amending regulations

pertaining to the National List of Allowed and Prohibited Substances. As required by the National Organic Foods Production Act of 1990, the allowed use of the 12 synthetic and non-synthetic substances in organic

production and handling will expire on September 12, 2001. The AMS published an advance notice of proposed rulemaking to make the public aware of this requirement. AMS believes that public comment is

USDA—AMS

Long-Term Actions

essential in the review process to determine whether these substances should continue to be allowed or prohibited in the production and handling of organic agricultural products.

7. MANDATORY COUNTRY OF ORIGIN LABELING OF BEEF, PORK, LAMB, FISH, PERISHABLE AGRICULTURAL COMMODITIES, AND PEANUTS (LS-07-0081)

Legal Authority: 7 USC 1621 to 1627, Agricultural Marketing Act of 1946

Abstract: The Farm Security and Rural Investment Act of 2002 (Farm Bill) (Pub. L. 107-171) and the 2002 Supplemental Appropriations Act (2002 Appropriations) (Pub. L. 107-206) amended the Agricultural Marketing Act of 1946 (Act) (7 U.S.C. 1621 et seq.) to require retailers to notify their customers of the country of origin of covered commodities beginning September 30, 2004. Covered commodities include muscle cuts of beef (including veal), lamb, and pork; ground beef, ground lamb, and ground pork; farm-raised fish and shellfish; wild fish and shellfish; perishable agricultural commodities; and peanuts. The FY 2004 Consolidated Appropriations bill (2004 Appropriations) (Pub. L. 108-199) delayed implementation of mandatory

Country of Origin Labeling (COOL) for all covered commodities except wild and farm-raised fish and shellfish until September 30, 2006. The FY 2006 Agriculture Appropriations Bill further delayed the implementation date for other covered commodities until September 30, 2008.

8. SPECIALTY CROP BLOCK GRANT PROGRAM (FARM BILL)

Legal Authority: 7 USC 1621

Abstract: The Agricultural Marketing Service is establishing regulations to administer the Special Crop Block Grant Program (SCBGP) to enhance the

competitiveness of specialty crops. The interim final rule is intended to establish eligibility and application requirements, the review and approval process, and grant administration procedures for SCBGP. The SCBGP is authorized under section 101 of the Specialty Crops Competitiveness Act (7 U.S.C. 1621 note) and amended under the Food, Conservation, and Energy Act of 2008. Section 101 direction the Secretary of Agriculture to make grants available to States.

9. FARM LOAN PROGRAMS LOAN MAKING ACTIVITIES

Legal Authority: PL 110-246

Abstract: The rule will implement the provisions of the 2008 Farm Bill that affect Farm Loan Programs (FLP) Loan Making Division (LMD); there is discretion involved in the implementation. The sections being implemented are: 5001, Direct Loans; 5005, Beginning Farmer or Rancher and Socially Disadvantaged Farmer or Rancher Contract Land Sales Program Down Payment Loan Program; 5101, Farming Experience as an Eligibility

Requirement; 5201, Eligibility of Equine Farmers and Ranchers for Emergency Loans; 5301, Beginning Farmer and Rancher Individual Development Accounts Pilot Program; and 5501, Loans to Purchase Highly Fractionated Land.

A Beginning Farmer and Rancher Individual Development Accounts 5-year pilot program will be established in at least 15 States. The program entails FSA making grants to qualified nonprofit organizations who then deliver the program to eligible participants. Grantees must match 50

percent of the grant received. Under the program, qualified, low-income beginning farmers or prospective beginning farmers would establish saving accounts with a monthly deposit plan administered by the grantees. The program funds must match the participants' deposits at a minimum of 100 percent and a maximum of 200 percent. Participants must use the savings account funds toward the purchase of farmland, livestock, or similar farm start-up/operating expenses. The program must be operated by and in conjunction with

USDA—FSA

Proposed Rule Stage

FSA farm loan programs. The initial applications for the program must be approved no more than one year after the law is enacted. The program is not mandatory; an appropriation of up to \$5 million annually is authorized to fund the program.

Individual tribal members will be allowed to qualify for Indian Land Acquisition loans.

RIN: 0560-AI03

10. CONSERVATION LOAN GUARANTEE PROGRAM

Legal Authority: PL 110-246

Abstract: The rule will implement the provisions of the 2008 Farm Bill that affect Farm Loan Programs (FLP) Loan Making Division (LMD); there is discretion in how several of the provisions are implemented. The section being implemented is 5002, Conservation Loan and Loan Guarantee. Implementation of this provision will create a new direct and guaranteed loan program directed at assisting farmers in implementing conservation practices.

The rule establishes a new loan and loan guarantee program to finance qualifying conservation projects. All

guarantees will be at 75 percent of the loan amount. The applicant must have an acceptable conservation plan that includes the project(s) to be financed. Preference is given to beginning farmer and socially disadvantaged applicants, conversion to sustainable or organic production practices, and compliance with highly erodible land conservation requirements. Eligibility for the program is not restricted to those who cannot get credit elsewhere. The program is not mandatory; appropriations are authorized.

11. LOAN SERVICING; FARM LOAN PROGRAMS

Legal Authority: PL 110-246

Abstract: The 2008 Farm Bill requires several changes to the Farm Service Agency (FSA) Farm Loan Program (FLP) loan servicing regulations. An overall plan will be established to insure that borrowers can be transitioned to private credit in the shortest timeframe practicable. At present, FSA monitors the status of all borrowers to determine if graduation is possible. The 2008 Farm Bill

emphasizes this responsibility and insures that FSA uses all the tools available to graduate borrowers to commercial credit as soon as they can financially do so. In 2007, over 2,500 direct borrowers (about 3.7 percent of the portfolio) graduated to commercial credit. FSA believes graduation will continue in the 3 to 5 percent range and is dependant on the overall farm economy.

The right of an FSA borrower-owner to purchase leased property under Homestead Protection will be extended beyond the borrower-owner to the immediate family. Currently, FSA only has 38 properties in Homestead Protection.

Acceleration and foreclosure will be suspended on borrowers who file a claim of program discrimination against the Department or have a claim pending. Interest accrual and offset will also be suspended during the time of the moratorium. If the borrower does not prevail in the claim, the interest which would have accrued during the moratorium will be due and offset on the account will be reestablished.

12. EMERGENCY FOREST RESTORATION PROGRAM

Legal Authority: PL 110-246

Abstract: We are adding a new subpart to the regulations in 7 CFR part 701 to implement the Emergency Forest Restoration Program (EFRP) which was authorized by the 2008 Farm Bill. EFRP will provide cost-share funding to owners of nonindustrial private forest

land to restore the land after the land is damaged by a natural disaster. The damaged land must have had a tree cover immediately before the natural disaster. The 2008 Farm Bill authorized such funds as may be necessary to be appropriated to carry out this program; the appropriated amounts are to remain available until expended.

13. BIOMASS CROP ASSISTANCE PROGRAM**Legal Authority:** PL 110-246

Abstract: We are adding a new regulation to implement the Biomass Crop Assistance Program (BCAP) as required by the 2008 Farm Bill. We will collaborate with USDA/Rural Development (RD), private industry, agricultural and forest land owners to support the evaluation and selection of BCAP project areas. BCAP project areas must include a commitment to use local production; evidence of sufficient

equity (if the facility is not operational at the time of proposal); anticipated economic impacts; opportunities for local ownership; the participation rate by beginning and socially disadvantaged farmers and ranchers; the impact on soil, water, and related resources; and the variety in biomass production approaches. FSA will partner with RD, which has capability and responsibility, including the potential for providing funding for proposed biomass conversion facility, regarding BCAP project area evaluation and selection. After BCAP project area selection, FSA, acting on behalf of the Commodity Credit Corporation (CCC), may enter into contracts with BCAP

project area producers for a term of up to 5 years for annual and perennial crops and up to 15 years for woody biomass.

14. ANIMAL WELFARE: MARINE MAMMALS; NONCONSENSUS LANGUAGE AND INTERACTIVE PROGRAMS (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)**Legal Authority:** 7 USC 2131 to 2159

Abstract: The U.S. Department of Agriculture regulates the humane handling, care, treatment, and transportation of certain marine mammals under the Animal Welfare Act. The present standards for these animals have been in effect since 1979, and amended in 1984. During this time, advances have been made and new information has been developed with regard to the housing and care of marine mammals. This rulemaking addresses marine mammal standards on which consensus was not reached during negotiated rulemaking conducted between September 1995 and July 1996. These include standards affecting variances, indoor facilities, outdoor facilities, space requirements, and water quality, as well as swim-with-the-dolphin programs. These actions appear necessary to ensure that the minimum standards for the humane handling, care, treatment, and transportation of marine mammals in captivity are based on current general, industry, and scientific knowledge and experience.

16. IMPORTATION OF PLANTS FOR PLANTING; ESTABLISHING A NEW CATEGORY OF PLANTS FOR PLANTING NOT AUTHORIZED FOR IMPORTATION PENDING RISK ASSESSMENT (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)**Legal Authority:** 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This action would establish a new category in the regulations governing the importation of nursery stock, also known as plants for planting. This category would list taxa of plants for planting whose importation is not authorized pending risk assessment. We would allow foreign governments to request that a pest risk assessment be conducted for a taxon whose importation is not authorized pending risk evaluation. After the pest risk assessment was completed, we would conduct rulemaking to remove the taxon from the proposed category if determined appropriate by the risk assessment. We are also proposing to expand the scope of the plants regulated in the plants for planting regulations to include non-vascular plants. These changes would

USDA—APHIS

Proposed Rule Stage

allow us to react more quickly to evidence that a taxon of plants for planting may pose a pest risk while ensuring that our actions are based on scientific evidence.

17. INTRODUCTION OF ORGANISMS AND PRODUCTS ALTERED OR PRODUCED THROUGH GENETIC ENGINEERING

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 31 USC 9701

Abstract: This rulemaking would revise the regulations regarding the importation, interstate movement, and environmental release of certain genetically engineered organisms in order to bring the regulations into alignment with provisions of the Plant Protection Act. The revisions would also update the regulations in response to advances in genetic science and technology and our accumulated experience in implementing the current regulations. This is the first comprehensive review and revision of the regulations since they were established in 1987. This rule would affect persons involved in the importation, interstate movement, or release into the environment of genetically engineered plants and certain other genetically engineered organisms.

18. TUBERCULOSIS IN CATTLE; IMPORT REQUIREMENTS FOR ROPING STEERS

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This document will withdraw a proposed rule that we published on August 24, 2004 (69 FR 51960 to 51962, APHIS Docket No. 03-081-3). In our August 2004 proposed rule, we proposed to require that steers and spayed heifers with any evidence of horn growth that are entering the United States meet the same tuberculosis testing requirements as sexually intact animals entering the United States. Instead of proposing provisions specific to cattle imported for use at rodeos, as our August 2004 proposal did, APHIS is considering broader changes to the tuberculosis regulations.

19. BOVINE SPONGIFORM ENCEPHALOPATHY; IMPORTATION OF BOVINES AND BOVINE PRODUCTS

Legal Authority: 7 USC 450; 7 USC 1622; 7 USC 7701 to 7772; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking would amend the regulations regarding the importation of bovines and bovine products. Under this rulemaking, countries would be classified as either negligible risk, controlled risk, or undetermined risk for bovine spongiform encephalopathy (BSE). Some commodities would be allowed importation into the United States regardless of the BSE classification of the country of export. Other commodities would be subject to importation restrictions or prohibitions based on the type of commodity and the BSE classification of the country. The criteria for country classification and commodity import would be closely aligned with those of the World Organization for Animal Health.

20. • SCRAPIE IN SHEEP AND GOATS

Legal Authority: 7 USC 8301 to 8317

Abstract: This rulemaking would amend the scrapie regulations by changing the risk groups and categories established for individual animals and for flocks, increasing the use of genetic testing as a means of assigning risk levels to animals, reducing movement restrictions for animals found to be

genetically less susceptible or resistant to scrapie, and simplifying, reducing, or removing certain recordkeeping requirements. This action would provide designated scrapie epidemiologists with more alternatives and flexibility when testing animals in order to determine flock designations under the regulations. It would change the definition of high-risk animal, which will change the types of animals eligible for indemnity, and to pay higher indemnity for certain pregnant ewes and early maturing ewes. It would also make the identification and recordkeeping requirements for goat owners consistent with those for sheep owners. These changes would affect sheep and goat producers and State governments.

21. PHYTOSANITARY CERTIFICATES FOR IMPORTED FRUITS AND VEGETABLES

Legal Authority: 7 USC 450; 7 USC
7701 to 7772; 7 USC 7781 to 7786; 21
USC 136 and 136a

Abstract: Currently APHIS does not require a phytosanitary certificate to accompany fruits and vegetables imported into the United States except for certain fruits and vegetables grown in designated foreign regions. This rule will require that a phytosanitary certificate accompany noncommercial consignments of fresh fruits and vegetables imported into the United States by air passengers.

22. PHYTOPHTHORA RAMORUM; QUARANTINE AND REGULATIONS

Legal Authority: 7 USC 7701 to 7772;
7 USC 7781 to 7786

Abstract: This action will amend the Phytophthora ramorum regulations to make the regulations consistent with a Federal Order issued by APHIS in December 2004 that established restrictions on the interstate movement of nursery stock from nurseries in nonquarantined counties in California, Oregon, and Washington. This action will also update conditions for the movement of regulated articles of nursery stock from quarantined areas, as well as restrict the interstate movement of all other nursery stock from nurseries in quarantined areas. We are also updating the list of plants regulated because of *P. ramorum* and the list of areas that are quarantined for *P. ramorum* and making other miscellaneous revisions to the regulations. These actions are necessary to prevent the spread of *P. ramorum* to noninfested areas of the United States. We will continue to update the regulations through additional rulemakings as new scientific information on this pathogen becomes available.

24. BOVINE SPONGIFORM ENCEPHALOPATHY; MINIMAL-RISK REGIONS AND IMPORTATION OF COMMODITIES; UNSEALING OF MEANS OF CONVEYANCE AND TRANSLOADING OF PRODUCTS

Legal Authority: 7 USC 450; 7 USC 1622; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701; 42 USC 4331 and 4332

Abstract: In a final rule published in the Federal Register on January 4, 2005, we amended the regulations regarding the importation of animals and animal products to establish a category of regions that present a minimal risk of introducing bovine spongiform encephalopathy into the United States via live ruminants and ruminant products and byproducts, and added Canada to this category. We also established conditions for the importation of certain live ruminants and ruminant products and byproducts from such regions. This rule will amend the regulations to broaden who is authorized to break seals on means of conveyances carrying certain ruminants of Canadian origin. Additionally, it will amend the regulations regarding the transiting through the United States of certain ruminant products from Canada to allow for direct transloading of the products from one means of conveyance to another in the United

States under Federal supervision. These actions will contribute to the humane treatment of ruminants shipped to the United States from Canada and remove an impediment to international trade, without increasing the risk of the BSE disease agent entering the United States.

25. STANDARDS FOR PERMANENT, PRIVATELY OWNED HORSE QUARANTINE FACILITIES (SECTION 610 REVIEW)

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will establish standards for the approval of permanent, privately owned quarantine facilities for horses. We are taking this action because regional and seasonal demand for quarantine services for horses often exceeds the space available at existing facilities. Allowing imported horses to be quarantined in permanent, privately owned quarantine facilities that meet these newly proposed criteria facilitates the importation of horses while continuing to protect against the introduction of communicable diseases of horses.

26. NATIONAL VETERINARY ACCREDITATION PROGRAM (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 7 USC 8301 to 8317; 15 USC 1828

Abstract: This rulemaking will amend the regulations regarding the National Veterinary Accreditation Program to establish two accreditation categories in place of the current single category, to add requirements for supplemental training and renewal of accreditation, and to offer accreditation specializations. These changes are intended to support the Agency's animal health safeguarding initiatives, to involve accredited veterinarians in integrated surveillance activities, and to make the provisions governing our National Veterinary Accreditation Program more uniform and consistent.

28. AGRICULTURAL INSPECTION AND AQI USER FEES ALONG THE U.S./CANADA BORDER

Legal Authority: 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 49 USC 80503

Abstract: This action will amend the foreign quarantine and user fee regulations by removing the exemptions from inspection for fruits and vegetables grown in Canada and the exemptions from user fees for commercial vessels, commercial trucks, commercial railroad cars, commercial aircraft, and international air passengers entering the United States from Canada. As a result of this action, all agricultural products imported from Canada will be subject to inspection, and commercial conveyances, as well as airline passengers arriving on flights from Canada, will be subject to inspection and user fees. We are taking this action in part because we are not recovering the costs of our current inspection activities at the U.S./Canada border. In addition, our data show an increasing number of interceptions on

the U.S./Canada border of prohibited material that originated in regions other than Canada that presents a high risk of introducing plant pests or animal diseases into the United States. These findings, combined with additional Canadian airport preclearance data on interceptions of ineligible agricultural products approaching the U.S. border from Canada, strongly indicate that we need to expand and strengthen our pest exclusion and smuggling interdiction efforts at that border. In order to do this and to recover the costs of our existing inspection activity, we need to collect user fees from commercial conveyances and international air passengers entering the United States from Canada.

29. CITRUS CANKER; QUARANTINE OF THE STATE OF FLORIDA

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This action will amend the citrus canker regulations to list the entire State of Florida as a quarantined area for citrus canker and amend the requirements for the movement of regulated articles from Florida now that the eradication of citrus canker in Florida is no longer being carried out as an objective. It will also amend the regulations to allow regulated articles that would not otherwise be eligible for interstate movement to be moved to a port for immediate export. These changes are necessary in light of the Department's determination that the established eradication program was no

longer a scientifically feasible option to address citrus canker.

30. USER FEES; EXPORT CERTIFICATION FOR PLANTS AND PLANT PRODUCTS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 49 USC 80503

Abstract: This rulemaking will amend the user fee regulations by adjusting the fees charged for export certification of plants and plant products. We are increasing these user fees for fiscal years 2009 through 2012 to reflect the anticipated costs associated with providing these services during each year. This action adds a new user fee for Federal export certificates for plants and plant products that an exporter obtains from a State or county cooperator in order to recover our costs associated with that service. Finally, the action will make several nonsubstantive changes to the regulations for clarity. These changes will enable us to properly recover the costs of providing export certification services for plants and plant products.

33. VIRAL HEMORRHAGIC SEPTICEMIA; INTERSTATE MOVEMENT AND IMPORT RESTRICTIONS ON CERTAIN LIVE FISH

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will establish regulations to restrict the interstate movement and importation into the United States of live fish that are susceptible to viral hemorrhagic septicemia, a highly contagious disease of certain fresh and saltwater fish. In 2005 and 2006, viral hemorrhagic septicemia was detected in freshwater fish in several of the Great Lakes and related tributaries. The disease has been responsible for several large-scale die-offs of wild fish in the Great Lakes region. This action is necessary to prevent further introductions into, and dissemination within, the United States of viral hemorrhagic septicemia.

34. IMPORTATION OF GRAPES FROM CHILE UNDER A SYSTEMS APPROACH

Legal Authority: 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a

Abstract: This action would amend the fruits and vegetables regulations to allow fresh table grapes from Chile to be imported into the continental United States under a systems approach. Currently, as a condition of entry, all table grapes from Chile must be fumigated with methyl bromide as a risk-mitigation measure for *Brevipalpus chilensis*. Under this proposal, we would allow a combination of risk-mitigation measures, or systems approach, to be employed in lieu of methyl bromide fumigation. The systems approach would provide an alternative to methyl bromide while continuing to provide protection against the introduction of quarantine pests into the United States.

RIN: 0579–AC82**35. CITRUS GREENING AND ASIAN CITRUS PSYLLID; QUARANTINE AND INTERSTATE MOVEMENT REGULATIONS**

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This rulemaking will establish regulations that designate the State of Florida and one parish in Louisiana as quarantined areas for citrus greening, and Alabama, Florida, Guam, Hawaii, Puerto Rico, Louisiana, Mississippi, Texas, 3 counties in South Carolina, and portions of 2 counties in

California as quarantined areas for Asian citrus psyllid, a vector of a bacterium that causes citrus greening. It would also establish restrictions on the interstate movement of regulated articles from the quarantined areas, as well as treatments under which Asian citrus psyllid host material may be moved interstate from a quarantined area. These actions follow the discovery of citrus greening and/or Asian citrus psyllid in the quarantined areas, and are necessary in order to prevent the spread of the disease and its vector to noninfested areas of the United States.

39. TUBERCULOSIS IN CATTLE; IMPORT REQUIREMENTS (SECTION 610 REVIEW)

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking would amend the regulations regarding the importation of animals into the United States to establish several levels of risk classifications to be applied to foreign regions with regard to tuberculosis and to establish requirements governing the importation of cattle and captive bison based on each risk classification. These changes are necessary to help ensure that cattle and captive bison infected with tuberculosis are not imported into the United States.

40. MINIMUM AGE REQUIREMENTS FOR THE TRANSPORT OF ANIMALS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations by adding minimum age and weaning requirements for the transport in commerce of animals. The regulations currently contain such requirements for dogs and cats, but no corresponding ones for other regulated animals, despite the risks associated with the early transport of these species. The rule would also provide an exemption to allow animals to be transported without their mothers for medical treatment and for scientific research before reaching the minimum age and weaning requirement, provided certain conditions are met. Establishing minimum age requirements for the transport of animals and providing for the transport of animals that have not met the minimum age requirements are necessary to help ensure the humane treatment of these animals.

41. ANIMAL WELFARE; CLIMATIC AND ENVIRONMENTAL CONDITIONS FOR TRANSPORTATION OF WARMBLOODED ANIMALS OTHER THAN MARINE MAMMALS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations regarding transportation of live animals other than marine mammals by removing the current ambient temperature requirements for various stages in the transportation of those animals. The action would replace those requirements with a single performance standard under which the animals would be transported under climatic and environmental conditions that are appropriate for their welfare. The regulations currently require that ambient temperatures be maintained within certain ranges during transportation, but animals may be transported at ambient temperatures below the minimum temperatures if their consignor provides a certificate signed by a veterinarian certifying that the animals are acclimated to temperatures lower than the minimum temperature. This proposal would make acclimation certificates for live animals other than marine mammals unnecessary. This rule would replace a previously published proposed rule, which we are withdrawing as part of this document, that would have required that the acclimation certificate for a dog or cat be signed by the owner of the dog or cat being transported rather than by a veterinarian. This rulemaking does not address marine mammals due to their unique requirements for care and handling. We believe that establishing a single performance standard would ensure that warmblooded animals other than marine mammals are transported in climatic and environmental conditions that are not detrimental to their welfare

while allowing for variations in climatic and environmental conditions that are suitable for individual animals.

42. IMPORTATION OF CATTLE FROM MEXICO; ADDITION OF PORT AT SAN LUIS, ARIZONA

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will amend the regulations regarding the importation of cattle from Mexico by adding San Luis, AZ, as a port through which cattle that have been infested with fever ticks or exposed to fever ticks or tick-borne diseases may be imported into the United States. A new facility for the handling of animals is to be constructed on the Mexican side of the border at the port of San Luis, AZ, that will be equipped with facilities necessary for the proper chute inspection, dipping, and testing that are required for such cattle under the regulations. The rule will also amend the regulations to remove provisions that limit the admission of cattle that have been infested with fever ticks or exposed to fever ticks or tick-borne diseases to the State of Texas. The statutory requirement that limited the admission of those cattle to the State of Texas has been repealed. These changes make an additional port of entry available and relieve restrictions on the movement of imported Mexican cattle within the United States.

43. HANDLING OF ANIMALS; CONTINGENCY PLANS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations to add requirements for contingency planning and training of personnel by research facilities and by dealers, exhibitors, intermediate handlers, and carriers. We are proposing these requirements because we believe all licensees and registrants should develop a contingency plan for all animals regulated under the Animal Welfare Act in an effort to better prepare for potential disasters. This action would heighten the awareness of licensees and registrants regarding their

responsibilities and help ensure a timely and appropriate response should an emergency or disaster occur.

44. BOVINE TUBERCULOSIS

Legal Authority: 7 USC 8301 to 8317

Abstract: This rulemaking would amend the bovine tuberculosis regulations by removing from incorporation by reference the Bovine Tuberculosis Eradication Uniform Methods and Rules, 1999, and including in 9 CFR part 77 all Federal requirements. We are also proposing a number of substantive changes to the requirements in order to enhance our

bovine tuberculosis eradication efforts. The proposed changes include, but are not limited to, tightening certain tuberculosis surveillance and reporting requirements; strengthening the quarantine and quarantine-release requirements; setting minimum testing ages, depending upon the status of the State or zone of origin and/or the purpose of movement, when testing is required for interstate movement of cattle and bison; adding new requirements to prevent the spread of tuberculosis from wildlife to cattle and bison; adding new requirements for interstate movement of dairy cattle; strengthening the requirements for individual cattle and bison that are to be added to accredited herds; and providing for the interstate movement of commuter herds. Finally, we would reorganize 9 CFR part 77 to make the regulations clearer and easier to use.

45. INTERSTATE MOVEMENT OF SHEEP AND GOATS; APPROVED LIVESTOCK FACILITIES, IDENTIFICATION, AND RECORDKEEPING REQUIREMENTS

Legal Authority: 7 USC 8301 to 8317

Abstract: This rulemaking will amend the regulations regarding the interstate movement of animals to require livestock facilities that handle sheep or goats in interstate commerce to be approved by APHIS. These will include stockyards, livestock markets, buying stations, concentration points, or any other premises where sheep or goats in interstate commerce are assembled. APHIS' approval will be contingent on the facility operator meeting certain minimum standards and other conditions relating to the receipt, handling, and release of sheep and goats at the facility, as well as complying with certain animal identification and recordkeeping

requirements. The standards and other conditions will be based, in part, on recently implemented regulations relating to the interstate movement of sheep and goats in order to control the spread of scrapie, a serious disease of sheep and goats. This rule will provide for the establishment of standards for the approval of livestock facilities that handle sheep or goats in interstate commerce.

46. CITRUS CANKER; INTERSTATE MOVEMENT OF REGULATED NURSERY STOCK FROM QUARANTINED AREAS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This rulemaking will amend the citrus canker quarantine regulations to explicitly prohibit, with limited exceptions, the interstate movement of regulated nursery stock from a quarantined area and remove calamondin plants from a protocol allowing the limited interstate movement of calamondin and kumquat plants. We decided to provide for the interstate movement of calamondin and kumquat plants based on their apparent resistance to citrus canker. However, we have since discovered calamondin plants affected with citrus canker. This action is necessary to clarify our regulations and to address the risk associated with the interstate

47. IMPORT/EXPORT USER FEES

Legal Authority: 5 USC 5542; 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 3701; 31 USC 3716 and 3717; 31 USC 3719; 31 USC 3720A

Abstract: This rulemaking would amend the regulations concerning user fees for import- and export-related services that we provide for animals, animal products, birds, germplasm, organisms, and vectors. We are proposing increases in those fees for fiscal years 2009 through 2013 in order to ensure that the fees accurately reflect the anticipated costs of providing these services each year. By publishing the annual user fee changes in advance, users can incorporate the fees into their budget planning. The user fees pay for the actual cost of providing these services.

48. REVISION OF REGULATIONS FOR THE MOVEMENT OF FRUITS AND VEGETABLES FROM HAWAII AND U.S. TERRITORIES INTO THE CONTINENTAL UNITED STATES

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This rulemaking will revise and reorganize the regulations pertaining to the interstate movement of fruits and vegetables from Hawaii and the territories to consolidate requirements of general applicability and eliminate redundant requirements, update terms and remove outdated requirements and references, and make various editorial and nonsubstantive changes to the regulations to make them easier to use. It will also make substantive changes to the regulations including establishing criteria within the regulations that, if met, will allow us to approve certain new fruits and vegetables for interstate movement in the United States and to acknowledge

pest-free areas in Hawaii and U.S. territories expeditiously, and remove the listing in the regulations of some specific commodities as regulated articles. These changes are intended to simplify and expedite our processes for approving certain regulated articles for interstate movement and acknowledging pest-free areas while continuing to allow for public participation in the processes. This final rule does not allow for the interstate movement of any specific new fruits or vegetables, nor does it alter the conditions for interstate movement of currently approved fruits or vegetables. These changes will make our domestic interstate movement regulations more consistent with our fruits and vegetables import regulations. The changes in this final rule will not alter the manner in which the risk associated with a regulated article interstate movement request is evaluated, nor will they alter the manner in which those risks are ultimately mitigated.

50. FEDERAL-STATE INTERSTATE SHIPMENT COOPERATIVE INSPECTION PROGRAM

Legal Authority: PL 110-246 (section 11015)

Abstract: FSIS is proposing regulations to implement a new voluntary Federal-State cooperative inspection program under which State-inspected establishments with 25 or fewer employees would be eligible to ship meat and poultry products in interstate commerce. State-inspected establishments selected to participate in this program would be required to comply with all Federal standards under the Federal Meat Inspection Act (FMIA) and the Poultry Products Inspection Act (PPIA). These

establishments would receive inspection services from State inspection personnel that have been trained and certified to assist with enforcement of the FMIA and PPIA. Meat and poultry products produced under the program that have been inspected and passed by selected State-inspection personnel would bear a Federal mark of inspection. FSIS is proposing these regulations in response to the Food, Conservation, and Energy Act, enacted on June 18, 2008 (the 2008 Farm Bill). Section 11015 of 2008 Farm Bill provides for the interstate shipment of State-inspected meat and poultry product from selected establishments and requires that FSIS promulgate implementing regulations no later than

18 months from the date of its enactment

51. PERFORMANCE STANDARDS FOR THE PRODUCTION OF PROCESSED MEAT AND POULTRY PRODUCTS; CONTROL OF LISTERIA MONOCYTOGENES IN READY-TO-EAT MEAT AND POULTRY PRODUCTS

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

Abstract: FSIS has proposed to establish pathogen reduction performance standards for all ready-to-eat (RTE) and partially heat-treated meat and poultry products, and measures, including testing, to control Listeria monocytogenes in RTE products. The performance standards spell out the objective level of pathogen reduction that establishments must meet during their operations in order to produce safe products but allow the use of customized, plant-specific processing procedures other than those prescribed in the earlier regulations. With HACCP, food safety performance

standards give establishments the incentive and flexibility to adopt innovative, science-based food safety processing procedures and controls, while providing objective, measurable standards that can be verified by Agency inspectional oversight. This set of performance standards will include and be consistent with standards already in place for certain ready-to-eat meat and poultry products.

52. SPECIAL AREAS; STATE-SPECIFIC INVENTORIED ROADLESS AREA MANAGEMENT: COLORADO

Legal Authority: Not Yet Determined

Abstract: On April 11, 2007, Governor of Colorado Ritter submitted a petition under the provisions of the Administrative Procedure Act (5 U.S.C. 553(e)) and Agriculture Department regulation (7 CFR 1.28) to promulgate regulations, in cooperation with the

State, for the management of inventoried roadless areas within the State of Colorado. After review and recommendation by the Roadless Area Conservation National Advisory Committee, the Secretary accepted the Governor's petition and initiated a

USDA—FS

Final Rule Stage

proposed rulemaking for inventoried roadless areas in Colorado. The proposed rulemaking would manage Colorado's inventoried roadless areas by prohibiting road building and tree cutting, with some exceptions, on 4.1 million acres of inventoried roadless areas in Colorado. The 4.1 million acres reflect the most updated IRA boundaries for Colorado, which incorporate planning rule revisions since 2001 on several Colorado national forests. Inventoried roadless areas that are allocated to ski area special uses (approximately 10,000 acres) would also be removed from roadless designation. Road construction and reconstruction plus timber harvesting would be prohibited in inventoried

roadless areas, with some exceptions, on the Arapaho-Roosevelt, Grand Mesa-Uncompahgre, Gunnison, Manti-La Sal, Pike-San Isabel, Rio Grande, Routt, San Juan, and White River National Forests in Colorado. Exceptions to the prohibitions would be allowed for certain health, safety, valid existing rights, resource protection, and ecological management needs.

Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480

Abstract: The Rural Business-Cooperative Service (Agency) is amending its regulation for clarity. This regulation provides financial assistance to agricultural producers and rural small businesses for the purpose of purchasing and installing renewable energy systems and energy efficiency improvements in rural areas. Financial

assistance to any single entity may be provided as a direct loan, guaranteed loan or grant, or a combination of a loan and grant. The current regulations were implemented in July of 2005. In reviewing the program, it has become evident that some of the language in the existing regulation was misinterpreted by field offices and

USDA—RBS

Proposed Rule Stage

applicants. With a relatively new program like this, it takes some time to get applications completed and the program reviewed before one realizes the need for corrections to Instruction language.
