CERTIFICATE FOR EXPORT OF POULTRY MEAT AND POULTRY MEAT PRODUCTS TO THE REPUBLIC OF KOREA (ROK)

CORRESPONDING EXPORT CERTIFICATE (FSIS FORM 9060-5) NO.

EST./PLANT NO., NAME, AND ADDRESS OF SLAUGHTERHOUSE(S)	EST./PLANT NO., NAME, AND ADDRESS OF PROCESSING (Cutting/Boning) PLANT
EST. NO., NAME, AND ADDRESS OF COLD STORAGE	PACKING OR PROCESSING DATES *(Must include month, day and year. Date ranges are acceptable)*
PLACE WHERE CERTIFICATE WAS ISSUED *(City and State)*	SLAUGHTER DATES *(Must include month, day and year. Date ranges are acceptable)*

1. The poultry meat and poultry meat products was/were derived from birds that were hatched and raised in the United States.
2. EITHER

   There have been no outbreaks of highly pathogenic avian influenza (HPAI) (as this disease is defined by the World Organization for Animal Health [OIE]) in the United States in the 12 months prior to export; however, in the case the Korean Ministry of Agriculture, Food and Rural Affairs (MAFRA) recognizes that an effective stamping-out policy for HPAI is in place in the United States, the period can be shortened in accordance with the OIE Terrestrial Animal Health Code.

   OR

   When highly pathogenic avian influenza (HPAI) occurs in the United States,

   a. The poultry meat and poultry meat products was/were derived from birds raised in the following State(s): _____ [insert State(s) of farm of origin]

   b. The poultry meat and poultry meat products was/were derived from birds raised, slaughtered, and processed in a State free from infection of poultry by HPAI. These birds did not pass through a State affected by HPAI on the way to slaughter.

   c. The slaughter facility producing the poultry meat and poultry meat products participates in the National Poultry Improvement Plan (NPIP), coordinated and administered by the government of the United States, and poultry flocks processed in these facilities for the poultry meat and poultry meat products have tested negative for HPAI in accordance with NPIP.
3. There have been no outbreaks of Newcastle disease nor low pathogenic avian influenza (as these diseases are defined by the OIE) within a 10 kilometer radius of the poultry farm(s) on which the source poultry were raised in the 3 months prior to slaughter.
4. There have been no outbreaks of fowl cholera, fowl typhoid, pullorum disease, infectious bursal disease, Marek's disease, duck virus enteritis (for duck meat only) nor duck viral hepatitis (for duck meat only) as recognized by the animal health authorities of the United States on the poultry farm(s) where the source poultry were raised in the 12 months prior to slaughter.
5. The exporting establishment(s) is/are not located within a disease control zone (federal quarantine) for any of the poultry diseases identified in statements 2-4 above.
6. The poultry meat and poultry meat products eligible for export to Korea was/were not commingled with imported poultry meat or poultry meat products ineligible for export to Korea.
7. The poultry meat and poultry meat products was/were derived from healthy birds subjected to ante-mortem and post-mortem inspection at the time of slaughter under the supervision of an official government veterinarian.
8. The poultry meat and poultry meat products was/were handled in such a manner as to prevent contamination by communicable poultry disease pathogens.
9. Based on the U.S. National Residue Program, the product covered by this certificate is free of harmful residues and shall comply with standards and specification requirements of FSIS.
10. The poultry was slaughtered, cut, processed, packed, stored, and handled in a sanitary manner.
