## \*Editor's Correction for Volume 20, Number 36\*

In the June 16, 2017 issue of the *Constituent Update* in the story "FSIS Announces Proposed Rule on Eligibility of the People's Republic of China to Export Poultry Products to the United States," FSIS incorrectly stated that the U.S. domestic annual production volume of RTE fully-cooked poultry is about 12.3 trillion pounds. The correct value is 12.3 billion pounds. The language indicating that the projected cooked poultry products from the PRC would only be about 2.6 percent of total U.S. production in the next five years is correct. The poundage has been corrected in the online version of the June 16, 2017 issue of the *Constituent Update*.
