INSTRUCTIONS:
This guide provides instructions on the use and care of Bullard Face Shields—Personal Protective Equipment (PPE) for eye and face protection as required by Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1910.132, PPE General Requirements and 29 CFR 1910.133, Eye and Face Protection, and as recommended by the Centers for Disease Control and OSHA in their Interim Guidance for Meat and Poultry Processing Workers and Employers. After reviewing the guide, and prior to performing work that requires the use of face protection, your supervisor may ask you to demonstrate your understanding of the information on this handout, such as your ability to properly order, assemble, and wear the face shield. You must also follow the specific manufacturer’s instructions on the care and use of these items.

This guide provides instructions on the use and care of the following PPE:
FSIS-96 Bullard Face Shield Model 840ME (visor)
FSIS-96A Bullard Model 300B Bracket (band mount)

ASSEMBLY:
The visor has a multi-hole pattern across the top, allowing it to easily fit onto the bracket carrier. It is locked into place with cam levers on each side of the bracket.

The bracket attaches to the hat via the channel on the front brim and stays fixed to the hat via the band, which can be tightened for different hard hat models.

The band goes around the back of the helmet and can be adjusted like goggles.

LIMITATIONS:
This visor is not compatible with chemical exposure. Exposure to chemicals during the cleaning process may cause the visor to become cloudy or create streaks. It may also reduce visibility.
CARE AND MAINTENANCE:
The FSIS 96 Bullard Face Shield Model 840ME (visor) and the FSIS-96A should be cleaned with mild dishwashing liquid, warm water, and a soft brush to remove any dirt from exterior surfaces.

For disinfection, diluted household bleach solutions, alcohol solutions with at least 70% alcohol, and most common SPA-registered household disinfectants should be effective for disinfecting exterior surfaces.

FSIS ORDERING INFORMATION:
Face shields may be ordered through the MMSC.
