NOTICE OF REINSTATEMENT OF SUSPENSION HELD IN ABYANCE

On October 25, 2021, your establishment received official notification from the Food Safety and Inspection Service (FSIS) of the reinstatement of suspension of the assignment of inspection personnel for slaughter operations at Haass’ Family Butcher Shop, Est. M8892. The decision to suspend inspection at your establishment was based on the determination by FSIS that your establishment failed to slaughter and handle animals humanely.

On October 25 and 26, 2021, you provided FSIS with proposed responses to the suspension action. Your responses outlined written corrective and preventive measures to bring your establishment into compliance with humane handling of livestock requirements and to achieve compliance with the Federal Meat Inspection Act (FMIA) (Title 21 of the United States Code [21 U.S.C] 603), the Humane Methods of Slaughter act of 1978 (HMSA) (7 U.S.C. 1901 et seq.), and federal regulations (Title 9 of the Code of Federal Regulations (9 CFR) parts 313). Based on your submitted written assurances, we have determined that the reinstated suspension of the assignment of inspectors for slaughter operations at your plant will be held in abeyance, in accordance with 9 CFR Part 500.5(e).

The reinstated suspension will remain in abeyance pending verification by FSIS that your proposed corrective and preventive measures have been effectively implemented. Plant personnel should monitor operations to prevent violations of humane handling and slaughter from occurring in the future. It is also important for you to understand the responsibility of FSIS to initiate action when there is a failure to operate in accordance with 9 CFR Part 313 of the regulations.

A revised copy of the FSIS Verification Plan is enclosed to assist you in understanding the nature and importance of the Agency’s verification activities. This FSIS Verification Plan is designed to verify that your establishment fully implements the corrective actions proffered in your proposed corrective actions, and that these revisions and corrective actions are effective in assuring ongoing regulatory compliance. It identifies your corrective action elements, the relevant regulatory requirements, the PHIS task under which corrective action elements will be verified, and the monitoring frequency. Only FSIS can amend the verification plan.
plan and any modifications to your submitted acceptable corrective actions made during the abeyance period will need to be submitted in writing to FSIS for verification of compliance prior to implementation by your establishment. FSIS will begin verification of your proposed actions before startup of your next scheduled slaughter.

Please be advised that, as a federally inspected establishment, you are expected to comply with FSIS regulations and to take appropriate corrective action to prevent Inhumane Handling of Livestock at your establishment. Your failure to comply with these requirements or to implement the measures in your action plan could result in reinstatement of the suspension of inspection at your establishment or other appropriate administrative or legal action.

If you have any questions, you may call me at 919-208-2945 or contact me via email at todd.furey2@usda.gov. You may also contact Dr. Arial Thompson, Deputy District Manager, at 919-208-2946.

Sincerely,

ARIAL THOMPSON

Todd Furey
District Manager

Quarterly Enforcement Report
Establishment File (Est. M8892)
Establishment Name: Haass’ Family Butcher Shop
Establishment Number: M8892
Two-Week Period Ending: ________________

Reason for Verification: On 10/25/2021, Establishment M8892 was issued a NOROS for failure to meet 9 CFR 313 of the regulations. On 10/26/2021, the establishment was issued a NOROSHIA after submitting acceptable corrective actions and preventive measures.

Information for Establishment Management: This verification plan was created from the corrective actions and preventive measures which were submitted to, and which were accepted by, the Raleigh District Office. As such, any changes to these corrective actions and preventive measures needs to be approved by the Raleigh District Office prior to implementation.

Instructions for completion of Humane Handling and Slaughter Verification form:
1. "Results of Verification" column should be recorded as "Acceptable", "Unacceptable", or "N/A"
2. "Inspection Actions" column should be used to document unacceptable findings or any additional corrective actions taken in compliance with 9 CFR 313.
3. The implementation and effectiveness of the establishment’s corrective actions should be verified at the frequencies stated below. The in-plant inspection team (IPP) can request, through supervisory channels, a change in the frequencies when the determination is made that the establishment has effectively implemented the corrective actions.
4. Each day verification activities are performed, IPP should add a Directed Livestock Humane Handling Verification task in PHIS and use the justification "Verification Plan for Enforcement Actions" to justify the scheduling of the Directed task.
5. IPP will provide bi-weekly verification updates detailing the results of verification activities and submit to the SPHV/FLS for review.
6. The completed bi-weekly report will be submitted via email to (b) (6) (b) (6)

<tbody>
<tr>
<td>1. For hog slaughter, verify that back-up stunning devices and ammunition are located near the kill location being used at the time. (Daily, for each slaughter day) (Discontinue verification after week ending 11/06/2021)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
2. Verify that an experienced employee is in place to stun the animals. *(Daily, for each slaughter day)*

3. Verify that Plant Manager monitors the hog stunning process. *(Daily for each day of hog slaughter)*

4. Verify that PM or Plant Owner monitors 100% of all stunning performed outside the regular stunning procedures (i.e., stunning of non-ambulatory, condemned, uncooperative animals, etc.) *(Daily for each slaughter day)*

5. Verify that the .410 shotgun with a slug is used to stun all cattle and as a backup for hogs. *(Daily for each slaughter day)*

6. Verify that the Plant Manager (PM) monitors the cattle stunning process at the following frequencies:
   a. First 2-week period: PM observes a minimum of 75% of the stunning
   b. Second 2-week period: PM observes a minimum of 50% of the stunning
   c. Final week: PM observes a minimum of 25% of the stunning *(Daily, for each slaughter day with hogs for 5 weeks)*

7. Verify that establishment employees notify inspection personnel when the firearm is set to be discharged for stunning. *(Daily for each slaughter day)*
