We are providing information as it become available. The Federal Government is offering all Americans free at-home COVID-19 testing kits to each household. The website has gone live. To request your free testing kits, please visit www.covidtests.gov.

Every home address in the U.S. is eligible to receive 4 free at-home COVID-19 tests. Orders are expected to ship in 7-12 days. We encourage you to order tests now so you and those in your household have them readily available when needed.

This is not a USDA or FSIS-specific program. It is open to the American public. Please visit the website for answers to frequently asked questions. The site also offers additional information regarding testing sites within communities, insurance reimbursement for testing, and other COVID-related resources.
