RE: Support for Animal Partisan Petition (#23-07)

Dear Deputy Under Secretary Eskin,

Please grant the petition filed by Animal Partisan on September 2, 2023 (#23-07). It asks FSIS to publish a notice clarifying that federal law does not necessarily prevent state government officials from bringing animal cruelty charges when farmed animals are abused in slaughter plants. It is a simple request and would require relatively little of the agency; yet, it could significantly improve the welfare of animals at slaughter.

Billions of animals are killed for food in the United States each year. All too often, while they await slaughter and during the slaughter process, these animals are severely mistreated. USDA records describe live birds having their heads, legs, feathers, and wings ripped off. Animals are kicked, dropped, beaten, and held for hours or days without protection from severe weather. Some of these incidents may violate state animal cruelty laws; yet, the USDA does not refer these cases to state law enforcement officials. Further, some local officials incorrectly believe that federal law prevents them from ever charging slaughter plants or personnel with animal cruelty, and the USDA has not dispelled that misguided notion.

I urge you to issue a notice clarifying the law in this regard and the important role that state authorities must play in holding companies and workers accountable when violations of state animal cruelty laws occur in slaughter plants.

Thank you,
