Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency’s estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by November 17, 2023 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Foreign Agricultural Service

Title: Export Sales of U.S. Agricultural Commodities.

OMB Control Number: 0551–0007.

Summary of Collection: The Export Sales of U.S. Agricultural Commodities is authorized by § 602 of the Agricultural Trade Act of 1978, as amended (7 U.S.C. 5712). The Export Sales of U.S. Agricultural Commodities requires the reporting of information pertaining to contracts for export sale of certain specified agricultural commodities that may be designated by the Secretary of Agriculture. U.S. exporters are required to report information on: (1) the quantity of a reportable commodity to be sold to a foreign buyer; (2) the country of destination; and (3) the marketing year of shipment. Data reported is aggregated and published in compilation form to protect business confidential information submitted.

The Export Sales Reporting and Maintenance System (ESRMS) was created after the large, unexpected purchase of U.S. wheat and corn by the Soviet Union in 1972. U.S. exporters are required to regularly report specific information on commodity shipments using ESRMS. The information reported is maintained by the exporters during the normal course of conducting business and is not an additional recordkeeping requirement for respondents.

Need and Use of the Information: The information collected under the Export Sales of U.S. Agricultural Commodities provides commodity market participants with information about commodity export commitments, and is one means by which USDA seeks to insure transparency, fairness, and soundness in commodity marketing. The information will be collected using FAS forms 97, 98,99, and 100. If the information were collected less frequently or not at all, the Department would not be in compliance with the statutes and not fulfilling the objectives of the export sales reporting program.

Description of Respondents: All exporters of wheat and wheat flour, feed grains, oilseeds, cotton, rice, cattle hides and skins, beef, pork, and any products thereof, and other commodities that the Secretary may designate as produced in the United States.

Number of Respondents: 414.

Frequency of Responses: Reporting: Other: Varies.

Total Burden Hours: 62,355.

Ruth Brown,

Departmental Information Collection Clearance Officer.

This is a new information collection with an estimated annual burden of 620 hours. On April 8, 2022, FSIS published a notice announcing this new information collection with an estimated annual burden of 310 hours. However, since publication, FSIS received an increased number of requests for participation in the pilot projects program. Therefore, FSIS is republishing the notice to increase the estimated annual burden by 310 hours for a total of 620 hours.

SUPPLEMENTARY INFORMATION:

Title: *Salmonella* Control Strategies Pilot Projects.

OMB Number: 0583–NEW.

Type of Request: Request for a new information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*). This statute mandates that FSIS protect the public by verifying that poultry products are safe, wholesome, unadulterated, and properly labeled and packaged.

FSIS is requesting a new information collection for pilot projects that test different control strategies for *Salmonella* contamination in poultry products. This is a new information collection with an estimated annual burden of 620 hours. On April 8, 2022, FSIS published a notice announcing this new information collection with an estimated annual burden of 310 hours. However, since publication, FSIS received an increased number of requests for participation in the pilot projects program. Therefore, FSIS is republishing the notice to increase the estimated annual burden by 310 hours for a total of 620 hours.

On October 19, 2021, USDA announced that FSIS would mobilize a stronger and more comprehensive effort to reduce *Salmonella* illnesses associated with poultry products.¹ A key component of this effort is identifying ways to incentivize the use

of preharvest controls to reduce *Salmonella* contamination coming into the slaughterhouse. Under the pilot projects program, establishments will experiment with new or existing pathogen control and measurement strategies and share data with FSIS. Associations may also submit aggregate data. The data will be analyzed by FSIS to determine whether they support changes to FSIS existing *Salmonella* control strategies.

FSIS has made the following estimates based upon an information collection assessment:

Estimate of burden: FSIS estimates that it will take each respondent an average of 15.5 hours per year for this collection of information.

Estimated total number of respondents: 40.

Estimated average number of responses per respondent: 7.

Estimated annual number of responses: 260.

Estimated annual burden on respondents: 620 hours.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; (202) 937–4272.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of FSIS' functions, including whether the information will have practical utility; (b) the accuracy of FSIS' estimate of the burden of the proposed collection of information, including the validity of the method and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20253.
