Country: United States

fresh meat of the relevant species without any supplementary guarantees for that species, except supplementary guarantee 'G', indicated in column 5 of the document relating to 'fresh meat of ungulates' published on GOV.UK, in accordance with Regulation (EU) No 206/2010.(†);]

- (*)**OR** [have been processed from bladders and/or intestines obtained from (*)[bovine], (*)[ovine and/or caprine], (*)[porcine animals] and during their processing have been:]
- (*)**EITHER** [salted with sodium chloride (NaCl), either dry or as saturated brine (aw<0.80), for a continuous period of 30 days or longer, at temperature of 20°C or above;]]
- (*)**OR** [salted with phosphate supplemented salt containing 86.5% NaCl, 10.7% Na₂HPO₄ and 2.8% Na₃PO₄ (weight/weight/weight), either dry or as saturated brine (aw<0.80), for a continuous period of 30 days or longer, at a temperature of 20°C or above;]]

AH/P903 Product requirements

have undergone all precautions to avoid recontamination after treatment;

Public Health

I hereby certify that the animal casings described in Part I of this certificate:

PH/D007 Bovine spongiform encephalopathy (BSE)

(*)[if containing material from bovine, ovine or caprine animals the following conditions must be met:

- (*)**EITHER** (1) [the country or region is classified with a negligible BSE risk and;
- (a) the animals from which the products were derived passed ante and post-mortem inspections;
 - (*)[(b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning;]
 - (*)[(c) the product does not contain and is not derived from specified risk material in compliance with GB regulations;]
 - (*)[(d) if the product contains or is derived from bovine, ovine or caprine mechanically separated meat that it complies with GB regulations; and]
 - (*)[(e) if the animals originate from a country or region classified with an undetermined BSE risk and:
 - (i) they have not been fed with meat-and-bone meal or greaves, and
 - (ii) the product was produced and handled in compliance with GB regulations with regard to contamination with nervous and lymphatic tissues;]]
- (*)**AND/OR** (2) [the country or region is classified with a controlled BSE risk and;
- (a) the animals from which the products were derived passed ante and post-mortem inspections;
 - (b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning; and
 - (*)[(c) the product does not contain and is not derived from specified risk material or mechanically separated meat in compliance with GB regulations;]
 - (*)[(d) the intestines were sourced from a country or region with negligible BSE risk and are derived from animals that were born, continuously reared and slaughtered in a country with negligible BSE risk that passed ante and post-mortem inspections, and

(Signature of Official Veterinarian)

II.a. Certificate reference no.	II.b.
---------------------------------	-------

Country: United States

- (*) **EITHER** (*) [(i) if the intestines were sourced from a country where there have been BSE indigenous cases, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced;]
- (*) **OR** (*) [(ii) if the intestines were sourced from a country where there have been BSE indigenous cases, the meat products do not contain and are not derived from specified risk material in accordance with GB regulations;]]]
- (*) **AND/OR** (3) [the country or region is classified with an undetermined BSE risk and;
- (a) the animals from which the products are derived were not fed meat-and-bone meal or greaves derived from ruminants and passed ante and post-mortem inspections;
- (b) the animals have been slaughtered in compliance with GB regulations in regards laceration of certain tissues after stunning; and
- (*) [(c) the product does not contain and is not derived from specified risk material, nervous and lymphatic tissues exposed during the deboning process; or mechanically separated meat. in compliance with GB regulations;]
- (*) [(d) the intestines were sourced from a country or region with negligible BSE risk and are derived from animals that were born, continuously reared and slaughtered in a country with negligible BSE risk that passed ante and post-mortem inspections, and
- (*) **EITHER** (*) [(i) if the intestines were sourced from a country where there have been BSE indigenous cases, the animals were born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been enforced;]
- (*) **OR** (*) [(ii) if the intestines were sourced from a country where there have been BSE indigenous cases, the meat products do not contain and are not derived from specified risk material in accordance with GB regulations;]]]]]

(*) Keep as appropriate.

Official Veterinarian

By signing this certificate, I certify that the requirements laid out above and in the accompanying notes for completion have been met.
