Attention: Mr. Ammar Mohammad, Owner

NOTICE OF SUSPENSION

This letter serves as official notification by the Food Safety and Inspection Service (FSIS) of our decision to withhold the federal marks of inspection and suspend the assignment of Inspection Program Personnel (IPP) at Gray's and Danny's Investment, Inc., Est. M40244, located at 29513 US Hwy. 27 Moore Haven, FL 33471. This letter follows verbal notification of the suspension action, provided by **(b) (6)**, Supervisory Public Health Veterinarian (SPHV) (DVMS) to you, on March 11, 2024. This action includes your Slaughter Hazard Analysis Critical Control Point (HACCP) processes employed at your establishment.

The decision to institute this enforcement action is in accordance with Title 9 of the Code of Federal Regulations (CFR), Rules of Practice 500.3(b), based on the determination that your establishment did not handle or slaughter animals humanely. The evidence demonstrates failure to comply with the Federal Meat Inspection Act (FMIA) (21 U.S.C. 603), the Humane Methods of Slaughter Act (HMSA) (7 U.S.C. 1901 *et seq.*), and the regulatory requirements (9 CFR Part 313).

Background/Authority

The FMIA (21 USC 601 *et seq.*) provides it is essential to the public interest that the health and welfare of consumers be protected, by assuring meat products distributed to them are wholesome, not adulterated, and properly marked, and labeled. The Act gives FSIS the authority, as designated by the Secretary of Agriculture, to prescribe rules and regulations describing sanitation requirements for inspected establishments and provide FSIS program personnel the authority to refuse to allow meat/meat food products to be marked, labeled, stamped, or

tagged as *inspected and passed*, to prevent the entry of adulterated products into commerce. Furthermore, the FMIA provides FSIS the authority to appoint inspectors to examine and inspect the method by which livestock are slaughtered and handled at slaughtering establishments.

The HMSA provides that Congress finds that the use of humane methods in the slaughter of livestock prevents needless suffering; results in safer and better working conditions for persons engaged in the slaughtering industry; brings about improvement of products and economies in slaughtering operations; and produces other benefits for producers, processors, and consumers which tend to expedite an orderly flow of livestock and livestock products in interstate and foreign commerce. It is therefore declared to be the policy of the United States that the slaughtering of livestock and the handling of livestock in connection with slaughter shall be carried out only by humane methods.

Under the authority of the Acts, FSIS has prescribed rules and regulations required for establishments slaughtering and handling livestock, as required by 9 CFR Part 313. FSIS has also developed the Rules of Practice regarding administrative enforcement, 9 CFR Part 500. The Rules of Practice describe the types of enforcement actions that FSIS may take and include procedures for taking a withholding action and/or suspension, with or without prior notification, and for filing a complaint to withdraw a grant of inspection. Specifically, 9 CFR 500.3(b) states that FSIS may impose a suspension without providing prior notification due to handling or slaughtering of animals inhumanely.

Findings/Basis for Action

On March 11, 2024, at approximately 1100 hours, while performing humane handling verification activities, in the slaughter trailer, IPP observed the following humane handling incident: a lamb that had undergone a ritual (Halal) slaughter cut, was observed walking around in the area designated for bleeding. IPP observed the wound where the animal had received a ritual cut was bleeding however the cut did not sever the carotid arteries. IPP immediately notified the establishment personnel that the animal needed to be slaughtered immediately. Upon notifying the employees of the issue, they attempted to catch the lamb to perform another cut. The lamb proceeded to jump over other bled out lamb carcasses into the skinning area. An employee caught the lamb, and another cut was made which severed the carotid arteries. Subsequently, the lamb suffered loss of consciousness due to anemia of the brain. IPP notified floor supervisor and plant manager of the noncompliance and tagged the slaughter area with US Reject tag number: B-45129202. The establishment does not have a Robust Systematic Approach (RSA) for humane handling of livestock.

On September 9, 2004, FSIS published "*Humane Handling and Slaughter Requirements and the Merits of a Systematic Approach to Meet Such Requirements*" in the Federal Register (69 FR 54625). On September 24, 2020, FSIS released FSIS Directive 6900.2 Revision 3, entitled, "*Humane Handling and Slaughter of Livestock*." Additionally, on October 23, 2013, FSIS introduced new guidance, titled "*FSIS Compliance Guide for a Systematic Approach to the Humane Handling of Livestock*." Within the guidance material

is information intended to better ensure the humane treatment of livestock presented for slaughter. The guidance material provides a set of practices designed to minimize excitement, discomfort, and accidental injury regarding the humane handling of livestock to include the four components of a robust systematic approach to humane handling.

When an establishment maintains a robust humane handling program, FSIS can exercise regulatory discretion when an inhumane handling or slaughter incident is observed. You do not currently maintain a written robust humane handling program for consideration.

Summary and Conclusion

Provisions of the FMIA outline FSIS' ability to refuse to render inspection and indefinitely withdraw inspection from an establishment, provided the establishment is afforded the right to an administrative hearing, when conditions exist where the slaughter and/or handling of livestock was not by a method in accordance with the Act(s). Evidence demonstrates your failure to meet regulatory requirements addressed in 9 CFR 313.2 (b) constituting a violation of the humane slaughter requirements and supporting the conclusion that your handling of livestock violated the provisions of the FMIA and HMSA.

Please provide a written response, inclusive of written corrective action and preventative measures, by addressing the following:

- Evaluate and identify the nature, cause of the incident.
- Describe the specific actions taken to eliminate the cause of the incident and prevent future recurrences.
- Describe specific monitoring activities planned to ensure future compliance.
- Provide any supporting documentation and records maintained and/or associated with the proposed corrective actions and preventative measures.

A determination of further administrative action will be made upon receipt and review of your submitted corrective actions and preventative measures. You are reminded that, as an operator of a federally inspected establishment, you are expected to comply with FSIS regulations and to take appropriate corrective actions to prevent the production of or adulterated products at your establishment. Please be advised that your failure to respond adequately to these issues may result in initiation of action to withdraw inspection from your establishment.

Appeal and Hearing Rights

You have the right to appeal this matter and can do so by contacting:

Karen Hunter
Executive Associate for Regulatory Operations
Office of Field Operations
