Attention: Travis Powell, Owner

NOTICE OF SUSPENSION

This letter serves as official notification by the Food Safety and Inspection Service (FSIS) of our decision to withhold the federal marks of inspection and suspend the assignment of Inspection Program Personnel (IPP) at Powell Meat Company LLC, located at 117 W Rives Road, Clinton, Missouri 64735. This letter follows verbal notification of the suspension action, provided by (b) (6) Consumer Safety Inspector, to Joe Applegate, Plant Manager at approximately 0716 hours on July 3, 2024. This action includes your Slaughter Hazard Analysis Critical Control Point (HACCP) process employed at your establishment.

The decision to institute this enforcement action is in accordance with Title 9 of the Code of Federal Regulations (CFR), Rules of Practice 500.3(b), based on the determination that your establishment did not handle or slaughter animals humanely. The evidence demonstrates failure to comply with the Federal Meat Inspection Act (FMIA) (21 U.S.C. 603), the Humane Methods of Slaughter Act (HMSA) (7 U.S.C. 1901 *et seq.*), and the regulatory requirements (9 CFR Part 313).

Background/Authority

The FMIA (21 USC 601 *et seq.*) provides it is essential to the public interest that the health and welfare of consumers be protected, by assuring meat products distributed to them are wholesome, not adulterated, and properly marked, and labeled. The Act gives FSIS the authority, as designated by the Secretary of Agriculture, to prescribe rules and regulations describing sanitation requirements for inspected establishments and provide FSIS program personnel the authority to refuse to allow meat/meat food products to be marked, labeled, stamped, or tagged as *inspected and passed*, to prevent the entry of adulterated products into commerce. Furthermore, the FMIA provides FSIS the authority to appoint inspectors to examine and inspect the method by which livestock are slaughtered and handled at slaughtering establishments.

The HMSA provides that Congress finds that the use of humane methods in the slaughter of livestock prevents needless suffering; results in safer and better working conditions for persons engaged in the slaughtering industry; brings about improvement of products and economies in slaughtering operations; and produces other benefits for producers, processors, and consumers which tend to expedite an orderly flow of livestock and livestock products in interstate and foreign commerce. It is therefore declared to be the policy of the United States that the slaughtering of

livestock and the handling of livestock in connection with slaughter shall be carried out only by humane methods.

Under the authority of the Acts, FSIS has prescribed rules and regulations required for establishments slaughtering and handling livestock, as required by 9 CFR Part 313. FSIS has also developed the Rules of Practice regarding administrative enforcement, 9 CFR Part 500. The Rules of Practice describe the types of enforcement actions that FSIS may take and include procedures for taking a withholding action and/or suspension, with or without prior notification, and for filing a complaint to withdraw a grant of inspection. Specifically, 9 CFR 500.3(b) states that FSIS may impose a suspension without providing prior notification due to handling or slaughtering of animals inhumanely.

Findings/Basis for Action

At approximately 0716 hours on July 3, 2024, FSIS Inspection Program Personnel (IPP) observed a humane handling incident, as documented in Noncompliance Record MCU3108073003N. The NR states the establishment employee placed the firearm directly on the top middle of the lamb's skull behind the ears. The establishment employee fired a shot and the lamb remained conscious, standing and was alert with its eyes tracking movement. The employee attempted apply a second stun in the same location. The lamb remained conscious, standing, and tracking movement with its eyes. The establishment employee reloaded the firearm and placed it in the same location on the back of the skull for the third stun attempt. After the third attempt, the animal remained conscious, went down in the hind end and kept its head up. On the fourth stun attempt with shot placement in the same location, the lamb remained standing on the front two legs with its head remaining in the upright position. On the fifth stun attempt with shot placement in the same area on the skull, the lamb was rendered unconscious. IPP immediately placed U.S Reject Tag B45619889 on the knock box and informed establishment management of the noncompliance.

On September 9, 2004, FSIS published "*Humane Handling and Slaughter Requirements and the Merits of a Systematic Approach to Meet Such Requirements*" in the Federal Register (69 FR 54625). On September 24, 2020, FSIS released FSIS Directive 6900.2 Revision 3, entitled, "*Humane Handling and Slaughter of Livestock*." Additionally, on October 23, 2013, FSIS introduced new guidance, titled "*FSIS Compliance Guide for a Systematic Approach to the Humane Handling of Livestock*." Within the guidance material is information intended to better ensure the humane treatment of livestock presented for slaughter. The guidance material provides a set of practices designed to minimize excitement, discomfort, and accidental injury regarding the humane handling of livestock to include the four components of a robust systematic approach to humane handling.

When an establishment maintains a robust humane handling program, FSIS can exercise regulatory discretion when an inhumane handling or slaughter incident is observed. You do not currently maintain a written humane handling program for consideration.

Summary and Conclusion

Provisions of the FMIA outline FSIS' ability to refuse to render inspection and indefinitely withdraw inspection from an establishment, provided the establishment is afforded the right to an administrative hearing, when conditions exist where the slaughter and/or handling of livestock was not by a method in accordance with the Act(s). Evidence demonstrates your failure to meet regulatory requirements addressed in 9 CFR 313.16(a)(1) and 313.16(a)(3), constituting a violation of the humane slaughter requirements, and supporting the conclusion that your handling of livestock violated the provisions of the FMIA and HMSA.

Please provide a written response, inclusive of written corrective action and preventative measures, by addressing the following:

- Evaluate and identify the nature, cause of the incident.
- Describe the specific actions taken to eliminate the cause of the incident and prevent future recurrences.
- Describe specific monitoring activities planned to ensure future compliance.
- Provide any supporting documentation and records maintained and/or associated with the proposed corrective actions and preventative measures.

A determination of further administrative action will be made upon receipt and review of your submitted corrective actions and preventative measures. You are reminded that, as an operator of a federally inspected establishment, you are expected to comply with FSIS regulations and to take appropriate corrective actions to prevent the production of or adulterated products at your establishment. Please be advised that your failure to respond adequately to these issues may result in our initiating action to withdraw inspection from your establishment.

Appeal and Hearing Rights

You have the right to appeal this matter and can do so by contacting:

Melissa Moore,
Executive Associate for Regulatory Operations
Office of Field Operations
Food Safety and Inspection Service
United States Department of Agriculture
SB, Room 3160
