*Meat, by definition, may contain trace quantities of sodium nitrite and sodium nitrate. These are naturally occurring in meat and are necessary for curing and preservation. They do not contain nitrosamines, which are a concern. The USDA has approved the use of sodium nitrite and sodium nitrate in meat products.

Beef used is raised without the use
of antibiotics or hormones.

**CATTLE DESERVE TO GRAZE
ON PASTURE THEIR ENTIRE LIVES.**

We started this company because we were fed up with Big
Agriculture. We believe cattle should graze freely on pastures,
indulging in grass, not penned into feedlots. Because after all,
grass is what nature intended for them to eat, not grain based
industrial feed.

PEOPLE DESERVE TO KNOW WHAT'S IN THEIR FOOD.

We also believe top-quality beef from grass-fed cattle simply
tastes good. And people are happier knowing what's in their
food. So that's why all of Teton's products are made from 100%
grass-fed, grass-finished beef. We urge you to try our products
and taste for yourself!
