

areas of Pennsylvania for calendar years 2005 and 2006, using a lower threshold of 40% of children being eligible for free or reduced price school meals instead of the 50% typically required for determining eligibility in areas in which poor economic conditions exist. The legislation allows Pennsylvania to use school or census data to determine eligibility of feeding sites. The evaluation will examine the impact of the change in threshold in terms of changes (increases) in the numbers and characteristics of participants, feeding sites, and services provided to eligible children. The evaluation component

will collect information from sponsors, site supervisors, site monitors, and sites operating SFSP sites in rural Pennsylvania. Three surveys will be conducted: (1) Sponsor survey, (2) site supervisor survey, and (3) site monitor survey. A report is due to Congress in January 2008.

Affected Public: Sponsors—Active rural site sponsors of SFSP in rural Pennsylvania, Site Supervisors—Supervisors of rural sites of SFSP that were open or enrolled and were active in 2006, and Site Monitors—Monitors are temporary state employees who serve to monitor the feeding activities of

the site. Active monitors of SFSP in rural Pennsylvania in 2006 will be interviewed.

Estimate of Burden:

Sponsor Survey: Public burden for respondents of the sponsor survey is estimated at 20 minutes for 55 respondents for one response each.

Site Supervisor Survey: Public burden for respondents of the site supervisor survey is estimated at 15 minutes for 232 respondents for one response each.

Site monitor survey: Public burden for respondents of the site monitor survey is estimated at 4 minutes for 19 respondents for one response each.

SUPPLEMENTARY INFORMATION:

Title: Forest Industries Data Collection.

OMB Number: 0596-0010.

Expiration Date of Approval: October 31, 2006.

Type of Request: Extension with Revision.

Abstract: The Forest and Range Renewable Resources Planning Act of 1974 and the Forest and Rangeland Renewable Resources Research Act of 1978 require the Forest Service to evaluate trends in the use of logs and wood chips, to forecast anticipated levels of logs and wood chips, and to analyze changes in the harvest of these resources from National Forest System lands. To collect this information, Forest Service personnel use two questionnaires, which respondents return in self-addressed, postage-paid envelopes.

Pulpwood Received Questionnaire: Forest Service personnel use this questionnaire to collect and evaluate information from pulp mills in order to monitor the volume, types, species, sources, and prices of timber products harvested throughout the Nation. The data collected will be used to provide essential information about the current use of the Nation's timber resources for pulpwood industrial products and is not available from other sources.

Logs and Other Roundwood Received: This questionnaire is used by Forest Service personnel to collect and evaluate information from primary wood-using mills, including small, part-time mills, as well as large corporate entities. Primary wood-using mills are facilities that use harvested wood in log or chip form, such as sawlogs, veneer logs, pulpwood, and pulp chips, to manufacture a secondary product, such as lumber or paper.
