

## Establishment Search

The Establishment Search page is available in several areas of PHIS. It is a common search page across the various places it is used. In many cases, searching by just the Number will return the establishment quickly. Sometimes, however, searching by Number will return multiple results, sometimes spanning multiple pages. This scenario is common for establishments with 2, 3, or 4 digit establishment numbers or those with suffixes associated with the same base establishment number.

In these cases, search by additional parameters, such as name, city, state, or Zip Code. The Establishment Search page has ten search parameters available, each described in the following table.
